FOOD WILL BE SCARCE IN '46

Keep Your Garden Producing All Summer!

On February 21, 1946, President Truman urged continuation of war program on Victory Gardens. The President issued this statement: "During the war period, gardening further demonstrated its value to our people in many ways. The splendid response to the appeal for more home-produced food was an important factor in making it possible during the war for the people of this country to be better fed than before the war while supplying the best-fed fighting forces in the world and providing essential food supplies to our allies. The threat of starvation in many parts of the world and the urgent need for food from this country emphasize the importance of continued effort to add to our total food supply this year.

"A continuing program of gardening will be of great benefit to our people. In addition to the contribution gardens make to better nutrition, their value in providing outdoor physical exercise, recreation and relaxation from the strain of modern life is widely recognized."

Stumpp & Walter Co.'s Giant Pansies

TREAT AS ANNUALS OR BIENNIALS

Sow in April and again in July and August in a light, cool, but well-moistened soil, enriched with General Garden Fertilizer. Cover them three times their diameter, and firm the soil. Seed-bed should not be allowed to dry out. Transplant to 1 foot apart. Protected in winter under glass, summer-sown plants are put out in bloom in April; carried over in the open they flower a month later.

Sawco Stupendous Pansies

HEMEROCALLIS • Daylily

Graceful, grass-like foliage sets off the fragrant lily-like flowers. We offer varieties blooming from May until July. After each variety is the date on which our first blooms appear. Flowering period is from 4 to 6 weeks.

From Mr. H. M. Russell of Spring, Texas, have come the Daylilies featured here. They are the result of years of hybridizing on his nine-acre farm, and they represent the cream of the crop. For every plant chosen, hundreds have been rejected because they did not meet Mr. Russell's rigid specifications.

Selections have been made on the basis of color, profusion of bloom, lasting quality, and plant habit.

We Offer These Two New Hybrids

SUNSHINE SERIES

Many people prefer the paler tints of lemon and gold, and to enable our customers to have some of the better new varieties in these light colors at a moderate price we have selected this Sunshine series. They include some of the finest sorts ever produced in these particular colors, to be sold unnamed and unlabeled, in mixture only. 55 cts. each, \$1.50 for 3, \$5.50 per doz., \$40 per 100.

JACOB MURRAY SERIES

These hybrids are made up of all the darker colored lilies so desired by everyone. They range in color from dark maroons, mahogany, rose, to tan and many bicolors. All are unusual colors and vary as to height and time of bloom. They are a definite addition to your perennial border. 65 cts. each, \$1.80 for 3, \$6.75 per doz., \$47.50 per 100.

BY ALL MEANS—*Plant Strawberries*

Strawberries have always been a favorite crop of the home gardener; of late years they have been so scarce and expensive on the market that to grow your own has been the only sure way of having this delicious fruit in quantity for your table. A Strawberry bed should be a part of every established home garden. It is not difficult to start one, and the delight experienced from growing a good crop is compensation for the work involved.

Well-drained soil is a requisite for Strawberries. They will not do well in a stiff clay; sandy loam is ideal, with a plentiful supply of moisture at all times. Select potted plants and space them at 9 to 12-inch intervals in rows 2 feet apart in spring or late summer. The potted plants which we offer have been established from late fall runners. They are fine strong specimens, ready to take hold as soon as they are transplanted to your garden.

The soil where Strawberry plants are to be set out should be carefully prepared ahead of time. Plow or spade it to a depth of 6 to 8 inches. Then with a rake, smooth and level

it off to form a bed. If you can get some well-rotted animal manure, spread it over the ground and work it in thoroughly before planting time. Our General Garden Fertilizer, applied as a side dressing in November and May, will also prove beneficial.

Set the plants out on a cool cloudy day if at all possible. In case of hot sunny weather after they are planted, shade them until the roots take hold. Place them at the same depth at which they were in the pot—with the bud just at the surface of the ground. Keep the row well weeded at all times, but when hoeing remember that the roots are very close to the surface. It is a good plan to spread about $\frac{1}{2}$ inch of peat moss under the plants in December, as winter protection. When spring comes, it can be brushed under the plants to conserve moisture in the soil and to keep the berries clean.

Strawberry plants produce runners that need to be kept in check. Retain enough of them to have a constant supply on hand for starting new rows, but do not allow your bed to become smothered with runners.

EARLY VARIETIES

BLAKEMORE. This extra-early variety is one of the most popular commercial sorts because it is such a good shipper. The berries are very firm, with a bright attractive color that lasts well. In size they are medium to large, with a tart flavor. Very productive; strong and vigorous. Splendid for preserving. U. S. Government variety.

DORSETT. A very fine sort for the home garden and local markets. The berries are large, bright red and cone-shaped. Extra fine in quality and flavor, making it a good dessert berry. The plants are unusually vigorous and need to be thinned out.

FAIRFAX. One of the very top varieties for family gardens and roadside markets because of its superb flavor and dark red berries. Sturdy, attractive plants with large, dark green leaves. Produces a good crop of blocky, rich red berries that are popular everywhere.

PREMIER. The best early Strawberry. It does well on any soil and even under unfavorable conditions will make a splendid crop. The berries are beautiful in appearance, having uniform shape and a glossy, rich red color that extends through the whole berry. Delicious flavor. We cannot recommend Premier too highly.

Potted Plants, \$2 per doz., \$3.50 for 25,
\$12.50 per 100

EVERBEARING VARIETIES

The following types produce flowers rather sparingly all season. By keeping them pinched off in spring and summer until August 15, and so building up reserve strength in the plant, a fair crop of good fruit will be developed for the autumn.

MASTODON. The most popular everbearing sort. Needs plenty of moisture all summer but not especially rich land. The strong, rugged plants can be depended on for a crop under almost any conditions. Large, bright red berries in spring as well as fall.

PROGRESSIVE. Medium-sized berries of full flavor are produced all season.

Potted Plants, \$2.50 per doz., \$4.50 for 25,
\$15 per 100

MIDSEASON AND LATE VARIETIES

BIG JOE. Extremely large, beautiful berries with large, bright green calyx. One of the best in flavor. Succeeds in almost all soils and under all conditions, and is therefore a valuable sort. A good producer, mid-season to late.

CATSKILL. Does especially well in the northern states. Can be depended on for a big crop of big berries in midseason. Fine quality and flavor; pleasing light red color, making them very showy. Firm enough for shipping short distances. Vigorous, healthy plants.

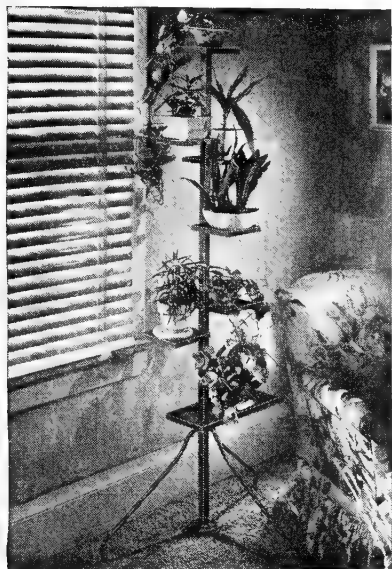

CHESAPEAKE. One of the leading main-crop sorts. Uniformly large, brilliant red berries of unsurpassed flavor. Very firm and long lasting, making it good for shipping. Resists drought well and is nearly frost-proof. The crop is not unusually heavy, but the quality is tops.

RED STAR. This is the latest very productive variety. Very good bright red color which does not turn dark. Fine quality and firm enough for distant shipping. The average size is large. Big, strong plants that produce a big crop.

Potted Plants, \$2 per doz., \$3.50 for 25,
\$12.50 per 100

TRANS-PLASTIC PAINT—Modern Beauty Long-lasting Colors

Walls, floors, linoleum, furniture will all be brighter, more attractive and last longer if protected with mar-proof, color-harmonizing Trans-Plastic. Use it inside or out, wherever colorful protection is desired. You'll be amazed at the difference just one coat will make, how it covers and hides in one coat over even old, badly worn surfaces. Mirror-like in smoothness, tough enough for industrial use, yet dainty enough to blend with the delicate

soft colors of the finest homes; provides a new note in modern decoration.

Trans-Plastic does not crack, chip or peel. It comes up gleaming even after frequent scrubbing and hard wear. Its glossy surface resists alcohol, fruit juices, heat, boiling water, and the daily torture of hard wear underfoot.

Gifts that are Unusual Because they are New

CHEMEX COFFEE MAKERS

One-piece heat-resistant glass with wood or cork handle. Coffee is placed in filter paper and fresh-boiling water poured on. Stand in an inch or so of water in a saucepan or skillet, which you keep boiling on the stove.

Grounds are removed with filter paper (more efficient than cloth), leaving perfect, crystal-clear, full-flavored, filtered coffee. Cleaned as easily as a cup. Equally good for iced coffee. In three sizes, each complete with filter papers and directions:

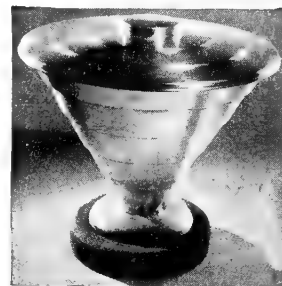

Pint model \$5.40, with 100 filters. Extra filter papers \$1.90 per 100.

Quart model \$6.90, with 100 filters. Extra filter papers \$1.90 per 100.

Half-gallon model \$16, with 100 filters. Extra filter papers \$4 per 100.

CINDERELLA PAIL

Made of aluminum. Useful for many purposes, but especially as a depository for waste and party refuse. Wax-paper liners keep the Cinderella sanitary and are disposed of with the rubbish; may be used without a liner if you wish, for it is readily cleaned. Stands in a maple and cork socket and has a closely fitting lid. Holds over 5 quarts. \$10. Liners, 300 for \$5.00. Complete \$15.

THE NEW KETTLE

Made of Aluminum, the revolutionary design enables you to fill it quickly, but it has no lid; so you can always see how much water you have. The cool, pendulum grip handle, made of walnut, is safe—no scalded hands. Flat design and large heating area means quick boiling—little more than three minutes on a good flame. It pours just as and where you want, with no drip. Holds 1 1/2 quarts. \$12.50.

THE MIXER JUG

For mixing and icing—cocktails, milk-shakes, lemonades, ice-coffee, ice-tea, ice-water, etc. Keeps them cold for hours for leisurely consumption at the table. Ideal ice-water carafe. Just the thing for picnics. Pre-cool with ice, refill with new ice and the drink, already cool. Holds back ice when pouring. Insulated with one inch of cork. \$22.50.

BOTTLE COOLER

Put in a trayful of ice-cubes, 12 ounces of salt and a little water. Insert wine, beer or soda bottle and move it up and down occasionally. It gets colder in a few minutes than it would in hours in the refrigerator. Made of heavy glass, insulated with cork, it is large enough to cool a one-quart bottle. Use it as a punch-bowl or ice-pail also. \$22.

THE NEW ICE PAIL

Made of heavy glass; a one-inch-thick cork jacket insulates it, and the ice will keep overnight if you pre-chill it before filling with ice. Sealed tight with a special lid, which you can use as a serving bowl. Capacity one-half gallon. \$22.50.

GLADIOLUS

Pre-Cooled Bulbs

May be planted from now until July 10

Many of our patrons desire Gladiolus bulbs for September blooming. In the neighborhood of New York they should be planted from now until July 10. Order the bulbs immediately; we reserve them and place them in our cold-storage warehouse.

Any good garden soil will grow Gladiolus well, provided they are planted in a sunny location. Bulbs should be 4 inches deep and at least 6 inches apart; frequent cultivation with a hoe or a weeder, around the base of the plant, is advisable. For best results, we recommend plants being staked when a foot high. Water copiously, and as the flower buds begin to form, apply liquid manure for exhibition spikes.

We offer below a selected list of varieties of this popular garden flower. We can supply these bulbs in seven separate colors, as well as a mixture of all colors.

COMMANDER KOEHL. Large, brilliant scarlet-blood flowers on a tall stem. Fine exhibition sort and one of the best reds. \$1.20 for 10, \$10 per 100.

MAID OF ORLEANS. The pure white florets have cream throats. Many florets in bloom at once. Excellent for exhibition. \$1.10 for 10, \$9 per 100.

MINUET. The blooms are of beautiful clear, light lavender, with four to six large, heavily textured blooms open at one time. Late. \$1.20 for 10, \$10 per 100.

ORANGE IMPERATOR. The large orange florets have excellent substance. A fine early variety. \$1.20 for 10, \$10 per 100.

PELEGRINA. One of the finest dark blue-violet varieties ever introduced, with large individual florets. \$1.20 for 10, \$10 per 100.

PICARDY. The individual flowers are delicate apricot-pink, extremely large, somewhat ruffled, and of heavy, wax-like substance. \$1.20 for 10, \$10 per 100.

YELLOW EMPEROR. The florets are self-colored, and about the same hue as King Alfred daffodil; handsome spikes. \$1.20 for 10; \$10 per 100.

AMERICAN HYBRIDS MIXED. Contains all the colors available in the flower. The popular price warrants liberal planting. Well matured and good; excellent for cut-flower purposes and mixed borders. 90 cts. for 10, \$8 per 100, \$75 per 1000.

GLADIOLUS THRIPS

A destructive insect of microscopic size causing a silvered appearance on the foliage, drying of the flower-buds, and a general blighting of the plant.

Gladiolus corms obtained from us have been treated to control thrips. On their arrival, however, we recommend:

Before Planting

1. Remove the skins, so that "bare" corms are planted. Do not injure the tips.
2. Stir 2½ ounces of Semesan in one gallon of water. Immerse the corms in the liquid for seven hours; dry and plant.

During Growth

3. Spray with Gladiolus Thrip Spray. Dissolve one pound in 10 gallons of water and apply every two weeks.

When Bulbs Are Lifted

4. In autumn, burn the tops cut from the lifted corms. Place corms in a low, but not freezing, temperature for six weeks.
5. Next cover with paper, first dusting through them one pound of Thripco to each 1000 corms; or you may use Naphthalene Flakes. Avoid containers with close-fitting lids; ventilation is necessary.
6. At the end of one month, shake out the Thripco or Naphthalene Flakes, and store the treated corms in the usual way.
